General Comment

I do not want AI companies to be immune from copyright infringement lawsuits. I am a working musician and it is hard enough to make a living as it is. Art in all of its forms is an important part of American culture and this would take it out of the hands of the people. Giving AI immunity from copyright infringement would not be good for the people of this country that you represent, it would only be effective in raising the wealth and capital for corporations who already have more than their fair share of what belongs to the people.

Please do not let AI technologies steal from artists.
