

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-1zuo-xb3r
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-7912

Comment on FR Doc # 2025-02305

Submitter Information

Name: Anonymous Anonymous

General Comment

Allowing AI to avoid copyright restrictions is going to be disastrous not just for the American people but for corporations. Allowing anyone to use generative AI with copyrighted materials will both impact the bottom line of companies and impact brand images. Malicious individuals would be able to generate content that portrays various intellectual properties in a negative, offensive, or shocking manner. This content could then be accessible by children on the internet, resulting in a situation similar to the content farms of Elsafe. Imagine that, but ten times worse and with ten times the amount of vulgar filth our children will be exposed to. This is the future that our children will be forced to live through if regulations regarding AI and copyright are not upheld. Generative AI has no place in the future of the United States of America, and we as a nation should be committed to protecting intellectual property, regulating the content that is posted online, and protecting our children.
