General Comment

Copyright must be protected. It is established law and case law that use of a copyrighted work to produce a "new" work is theft (Grand Upright Music Ltd. vs. Warner Brothers Records, LTD). If access to copyrighted works is necessary for the development of AI, then the AI companies need to fairly compensate copyright holders on mutually agreed terms. This should be considered a development cost, just as coders and hardware are. If an AI company is unwilling to respect copyright, they should suffer legal consequences, not be shielded from them.
