## General Comment

I do not believe AI holds a place in the future of the US.

AI steals from my livelihood as an American and profits off of theft.

AI is overhyped and is fleecing the eyes of the American public.

It's as simple as that. There is no benefit only loss as it wouldn't help a soul other than to reproduce garbage that none would even dare to look at.

AI should not, at all, hold any sort of place in the future of the country as it's just a prettier looking theft tool that holds no merit for being implemented in anything.
