General Comment

Under no circumstances is AI entitled to the fruits of work done by creative artists protected by copyright, even if that copyright is implied and not registered.

If that imposes risks and/or higher costs on AI, then the owners/operators of that AI can assess those risks and choose to accept them or decline. They do not get a free pass to steal from and then incorporate the work of others' creativity for no fee or payment, and at no risk. Basic fairness to those who have created works must be honored.

AI is not somehow magical or special, deserving of removing rights from artists.
