General Comment

To allow Artificial Intelligence (AI) to train on copyrighted works without the EXPRESS approval of the copyright holders is theft. It devalues American labor and puts artists, writers and other creatives out of business. To offer no compensation for creators whose works are used to train AI is theft. The guardrails are there for a reason and it's to protect American jobs, not make life harder for Sam Altman and others who are pushing AI as the wave of the future. Allowing OpenAI, ChatGPT and other AIs unlimited access to all copyrighted works to train their AI is not going to make AI better, it's only going to ruin America's creative economy.
