General Comment

Neither Elon Musk nor Sam Altman should be anywhere near this project. They have proven themselves to be deeply unserious technologists who are only using regulatory capture to further their private business ventures. They do not have the people's best interests at heart.

Additionally, GenAI should have remained in the realm of academia until they found a way to train models on data that they actually own. Or we could have abandoned GenAI and stuck with more traditional models or whatever discovery comes next. As it stands, the AI Action Plan is better positioned to bolster spurious claims made by a bunch of snake oil salesman than do anything to actually benefit the American worker. People will get laid because a bunch of know-nothing CEOs believe it can replace jobs they couldn't do themselves and don't understand all while we make the rich even richer.
