General Comment

AI is an imperfect tool that only takes what others have made and regurgitates it for someone else to call their own. Its is incredibly inaccurate, most Google searches using AI are a prime example. Using it for voices is dangerous and another method to underpay talent. Art AI is theft, plain and simple.

If AI is allowed a larger role in government then we'll be chasing down falsehood after falsehood with no accountability. But you already let one moron with AI into our private data so why don't you take a closer look at what you know who is getting out of his "supposed" role.
