General Comment

We do not need AI to succeed, and it has proven to be unreliable, frequently producing misinformation and outright lies. Aside from the obvious issues of not working well enough for any mass usage, it relies on theft and copyright infringement to produce anything at all, stealing money from both big businesses and small ones alike.

Allowing AI to steal data would not only weaken our economy by making data and processes more difficult, it also weakens our military, law enforcement, and other governmental bodies by obfuscating true, reliable information and their direct sources.

Do not allow this blatant theft to continue.
