Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-8015
Comment on FR Doc # 2025-02305

Submitter Information

Name: Cyrus G

General Comment

I believe that allowing AI companies to harvest the intellectual property of American artists and scientists goes against the core American dream of people being able to make it in America by plying their own trade and starting their own business. Writers, musicians, visual artists, actors and more all put massive amounts of work into creating their art, and they deserve protections from corporations stealing their hard work. Artists should be able to make a living by creating new and beautiful works of art without having to worry about somebody who has never picked up a brush, an instrument or microphone stealing their work.

Additionally, AI consumes a huge amount of power and water, two resources that will be in increasingly short supply as the population grows and as the changing climate increases the frequency of natural disasters damaging critical infrastructure.

The increasing prevalence of AI deepfakes poses serious risks to our political system, massively increasing the effectiveness of fake news, as well as making it easier to create. This risk is both foreign and domestic, it strikes at the core us ideal of free and fair elections.
