Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-8022

Comment on FR Doc # 2025-02305

Submitter Information

Name: Ian Johnson

Address:

General Comment

Artificial intelligence is a very new technology, but its implementation has already proven to be disruptive and harmful. A recent study of ChatGPT has shown that it is much more likely to make up an answer than admit it does not have access to solid data when answering a question. Generative AI from Midjourney, Stable Diffusion, and other algorithms is harming our arts and culture by flooding the internet with sloppy, low quality images. Several online media outlets have laid off a lot of their workforce, preferring to use AI to generate articles which often contain factual errors. None of this helps to improve our country. AI is not the transformative tool its proponents claim it to be. Things worked just fine before AI came along. I urge lawmakers to put a tight leash on this technology and to outright ban generative AI in particular, which provides a service only by copying and regurgitating copyrighted works without the consent of their creators and owners. We can find far better tools than AI to improve the USA.
