General Comment

AI is a horrible tool that has been introduced to our country. It has been manipulated into creating false information to trick innocent individuals. It is harmful for the mental development of our children and our country. It's used as a cover for big tech companies to spy on the public and steal their personal information. It takes away the jobs of many talented individuals and instead replaces them with subpar results that are stolen from the work done by many others. It destroys the livelihoods of those who create for a living, and destroys any chance of them having a future they can be proud of. AI steals copyrighted works and is not ethical to use under any circumstances. Its use is illegal, and it should not be allowed to continue. AI should not be allowed to use the works of others.
