General Comment

Copyright is an ESSENTIAL part of American law. Allowing any corporation to ignore it destroys the foundation of innovation and creativity that's responsible for America's success.

I do not believe AI holds a place in the future of the US - It steals from me directly, as a creative professional, by reducing my job opportunities, and profits off of theft.

AI destroys the meritocracy that is the foundation of American social order, and is being used to defraud the American public for the enrichment of failed hype-men CEOs who will use it to annihilate the technology jobs market and offshore their revenues.

Please, don't let them steal our future.
