General Comment

This is preposterous. This is a labor issue. The tech companies are asking to be allowed to steal legally from workers in all creative fields. Think of all the money that movies, TV, video games, books, and more generate for the US economy, and the tech industry wants to cripple that workforce for a quick buck on a subpar product with the bottom falling out within the next few years anyway, inevitably taking a massive chunk of our economy and our creative industries with it. If the tech industry is not capable of creating a cost-effective product without cannibalizing the economy then they've already failed and should not be rewarded for it.
