General Comment

If I have to pay a license to rights-holders to use copyright work in my projects, then so does a company or organization training an AI on said work for the purposes of commercial profit. OpenAI and other AI tech companies, even those claiming non-profit status, are absolutely using copyright assets for the purpose of generating revenue without compensating the rights-holders. If they are allowed to use these works without respecting copyright law, then the law is null and void. If Adobe or Microsoft get to use my copyrights without permission or compensation, then I can use WarnerDiscovery's material without permission or compensation in my next project. Either copyright law applies to all of us or to none of us.
