General Comment

Generative AI was trained on the images/ works of millions with no input or pay. This gross violation of our property is now used to compete with artists, taking jobs away from artist.

It is possible for Gen AI to be made ethically, but currently all models are trained on data scrapped from the internet including copywritten and trademarked works.

Measures need to be taken to reduce the already tremendous amount of damage unregulated AI has done to not only artists, but public figures, and others.

Thank you for reading my message.
