General Comment

As a small artist who makes content for YouTube, I am completely against giving freedom to OpenAI for source to hard work of others without cost. Not only does Generative AI create a product in direct competition with millions of artists on the internet, it does so using an algorithm trained on the works of those same artists it seeks to replace. This is, plain and simple, theft of intellectual property. Furthermore, the works OpenAI creates is often produced in mass with limited oversight, causing it to lack artistic merit or, in the case of informational material like some YouTube videos or articles, contain incorrect and misleading information with no sense of intention from its creator. AI can be a valuable tool to make our lives easier, but not without oversight, and not without protecting the rights of artists to own their work.
