General Comment

AI cannot be allowed the protections that companies such as OpenAI and Google are asking for. It will only result in mass theft of IP and constant recycling of ideas to the point that all we end up producing is soulless, inefficient garbage. It was never meant to be used for generation or for learning information on the scale they're trying to do it at, and ESPECIALLY not in a constant stream of information like the Internet, where anyone could feed it false or faulty information.
