

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-28q0-y4jd
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-8105

Comment on FR Doc # 2025-02305

Submitter Information

Name: Jessica Feller

Address: United States,

Email: [REDACTED]

General Comment

AI is not good for the American people and it won't just cost people their jobs, it will do those jobs poorly.

Setting aside the fact that generative AI only exists due to outrageous theft of non-consenting individuals who put time and effort into their craft, a lot of the information given by AI is not just wrong, but confidently wrong, feeding misinformation based on the incorrect STOLEN data.

There is an AI model that a stranger made that exists entirely off of my artwork specifically to steal directly from me. While I do think it does a poor job of imitating my work, this is still a clear threat to my livelihood and a blatant theft of years of my growth as an artist.

As a consumer, I am constantly frustrated trying to navigate the way AI has been constantly shoved down my throat. I'm exhausted having to search for images or information, looking for truth, only to stumble upon AI-written word-salad, or a plethora of AI images that are also incorrect. I've now had to alter my searches to show only results pre-2020 to avoid bad information.

Having such a flawed system out there, I can't imagine it being used for anything at this point. To think this is used to incorrectly deny insurance claims?

Let's say AI does get itself together by successfully stealing from billions of hardworking individuals. Many businesses are very eager to fire all their employees in hopes to replace them with AI in order to cut costs. What will happen when there are no Americans left to buy products? It's now more clear than ever that "trickle-down" was a big funny joke, since the job creators are so eager to stop creating jobs altogether.

There is no place for AI, it exists on theft, and it can't even get THAT right.
