

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-29bj-evfl
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-8119

Comment on FR Doc # 2025-02305

Submitter Information

Name: Bonita Lewis

Email: [REDACTED]

General Comment

"...the United States can solidify its position as the leader in AI and secure a brighter future for all Americans."

What "all Americans" is this referring to? Is this really a brighter future for the Americans who are having their work stolen by AI without any compensation? A brighter future to all the Americans that are losing their positions in companies to AI? A brighter future for all the Americans that are now shoved AI features that can not be turned off, or are opted-in from the start, barely mentioned and the way to disable them tucked away in the back corners of settings? How bright of a future is one where Americans don't know how to research anything on their own because AI is always holding their hand?

Will it really be a brighter future if AI companies can train their machines with less restrictions- or rather, steal more of whatever they want to fill their database?

This will be more secure?

Why does it matter so much for America to be the leader in AI if it's tearing apart our job market, hampering on the growth of critical thinking and self-reliance, making our artists and other creatives suffer, and will be overtly obtrusive in our day to day lives- taking what it wants without our proper consent?

So, let me ask again- who are the Americans that will be securing a brighter future from this? I think we all know that it will not be "all," far from it.
