General Comment

AI, in its current state, with current laws, does not have a place in the future of the United States. It is severely unreliable, answering straightforward questions in a hallucinatory manner. Its servers are bloated with contradicting information it cannot discern as fiction or fact. Generative AI steals from artists, taking images protected by copyright, and allowing people with no appreciation for the creative process to profit off stolen work. It does not think, it does not feel, it is a ghost in a machine that costs more energy to run than the useless drivel it spittles out in return. It makes people stupid. It cannot be allowed to create, to judge, or god forbid, to govern.
