General Comment

I believe AI puts individual liberty at risk and therefore the future of American prosperity depends on its strict regulation.

AI technology and the deregulation of it would further damage the lives of hardworking American businesses and freelance workers who specialize in production of material such as graphic design and music.

It also threatens the safety of individual American citizens with its known usage regarding exploitation through misinformation and fabrications (including deepfakes) using AI-generated imagery, videos, and images, especially the safety of women and minors.
