General Comment

AI and LLM tools only work when fed enough data, but they should not be allowed to freely access content created by actual human beings. This is in direct violation of copyright laws and allows AI companies to profit off of the hard work of people producing actual products. Overriding a person's individual creative property rights for the profits of corporations is antithetical to the foundational principles of America. If technology companies want access to the data to improve their tools, they need to pay for it just like anyone else. Anything else is theft of intellectual property for private gains.
