Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-8184

Comment on FR Doc # 2025-02305

Submitter Information

Name: James Allan

General Comment

I feel that AI is mostly bad for people in general. Not only is corporations trying to replace human labor with a machine that spits out mediocre and souless work, it also makes it so we don't take the time to learn new skills. If AI is there, why learn how to grammar check yourself? Why learn how to code? It's the same idea as using maps apps to me. I used to know the city I lived in before I got a smart phone, but after moving to a new city, I have never had a reason to learn the city since I have directions everywhere. Apply that to far more aspects of life, and we are all just going to get dumber. That doesn't include the environmental effects it has as well. Overall it is very anti human.
