General Comment

Just recently, OpenAI released a statement saying that AI is over, because AI materials are not copyrightable and rely on stolen property. Given that, why in the world is the US wasting its money and time on a technology that is proven to be pretty useless as well as hastening the destruction of our planet. Studies have proven time and again that AI provides incorrect answers or invented information up to 60% of the time. See, e.g. <https://arstechnica.com/ai/2025/03/ai-search-engines-give-incorrect-answers-at-an-alarming-60-rate-study-says/>

Moreover, AI aggregates data and has a high potential to spit out personally identifying private information to unauthorized sources. These machines are rife with bias and invention and undermine our national security interests.

Divest from AI, or else this country will regret it.
