General Comment

Hello, I am a student in Ohio about to enter psychological education. Generative AI concerns me, given that it pulls information from the Web with no real logic regarding reliable sourcing. This means many of my fellow students repeat false and inaccurate information uncritically on a regular basis. What's worse is that many educators now seem to be using Generative AI for their assignments and lesson plans, normalizing this behavior.

I fear that placing no restrictions on the AI industry will only hamper American education and endanger the public good by creating a less-informed populace.
