Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-8270

Comment on FR Doc # 2025-02305

Submitter Information

Name: Tank Roy

Address:

General Comment

The AI systems made by Big Tech companies like OpenAI (Microsoft) and Google threaten to destroy thousands of American small businesses like mine with their recent demand to create special carve outs in copyright law.

I've seen this all over Birmingham- from Show Posters to my own boss using it to write scripts to automate spreadsheets. While i have no doubt there may be some sundry use for automation, we must ask ourselves as artists, "Where does the buck stop?"

I am a painter, I arrange music for my friends to read poetry to, I love art and artists all over America and the world. How are they supposed to continue to make a living in the arts? What will the government do to ensure they can survive if not by the fruits of their labor? We cannot have an exception for a corporate entity to dodge scrutiny on theft of people's art.

I have no doubt there will come a time where we wield these tools with respect for the crafts that they purport to automate, but as they stand now? They are by and large being used to threaten working Americans.

Take two seconds and consider that being "good for business" is not, nor has ever been, good for people.
