General Comment

I do not believe AI holds a place in the future of the US. AI steals from my livelihood as an American and profits off of theft. AI is overhyped and is fleecing the eyes of the American public. AI is a dead end technology at the end of its hype cycle. Companies and investors are throwing money at this tool hoping to stumble onto a way to make money; none have succeeded so far and new models show that building bigger models yields fewer and fewer returns.
