Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-2hdk-lwks
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-8320
Comment on FR Doc # 2025-02305

Submitter Information

Name: Joseph Sanchez

General Comment

So, don't allow this to happen.

This gives precedent to allow companies to not only obtain data for use in their AI, but also allow them to obtain data from other AI as well.

Think about what practical use is there for AI for a typical consumer?

There is none, especially for an average consumer.

This pushes away any humanity we have left in America. All for companies to save less than 1 percent in profits.

Besides, all the energy spent is taxing our weak energy supply to power and store these AI databases, mainframes, and server farms.

So, in short, AI is bad in commercial use.

Scientific, medical, and government use would be better suited, for specific assistance related tasks.

DO NOT EVER USE IT AS A MAIN SOURCE SUCH AS REPLACING HUMAN ELEMENTS. Assisting human elements should be the main goal.
