As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-2hxm-z4ol
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-8330
Comment on FR Doc # 2025-02305

Submitter Information

Name: Jen Jones
Email: [REDACTED]

General Comment

AI as it exists today is nothing more than a plagiarism machine. It is not "trained" on other people's work so much as it outright steals other people's work and then remixes it into something that is soulless and mediocre. Musk and Altman don't want to compensate the owners of copyrighted works that they use for their AI models, they want to outright steal it, and not even give copyright owners the option to opt out. This is theft, pure and simple, and if their business model depends on theft, then they have a terrible business model. Furthermore, it is clear just how completely unreliable AI is; all you have to do is search anything online using AI and you will see answers that are just plain wrong. As a person working in IT, I can say that the only acceptable use of AI is when it is using data from a controlled, validated data set that is thoroughly vetted and tested to ensure it is producing the correct results. This is not what Musk, Altman, Zuckerberg, Google, et al are doing - they are stealing content to stick into a massive data lake that is not vetted or validated in any way, and they are not properly fine-tuning the results. AI, particularly OpenAI, is theft. It's not usable and it's not safe, and it is the exact opposite of intelligent.

Stop trying to replace living, breathing, THINKING human beings with machines. The tech is just not there yet.
