

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-2i43-nm4r
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-8336
Comment on FR Doc # 2025-02305

Submitter Information

Name: Tristan Smith

[REDACTED]

General Comment

AI may be a part of our future but we should not run head long into its development without properly considering the consequences of unrestricted use of AI. Even in the short amount of time that AI had been available we have already been able to see what kind of damage it can cause.

If we must develop AI to secure a safe future we must ensure that it is done properly and those who use it for ill purposes are properly punished. We also need to ensure that humans are at the forefront of creation and not allow AI to replace one of the few true expressions of the human experience. Since AI does not create and simply imitates all artist whose work is used in AI should be properly compensated and be allowed to opt out of their work being used. If AI can not survive without Artist consent then AI should not survive at all.

Please seriously consider the harm that can be caused if careful regulations are not out in place to protect everyone from the harm that AI can cause. Do not allow the thought of large profit gains to hide the real human harm and suffering caused by its misuse.
