

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-2f9d-09sh
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-8341
Comment on FR Doc # 2025-02305

Submitter Information

Name: Anonymous Anonymous
Email: [REDACTED]

General Comment

AI generated crap has been used to plagiarize my copyrighted works and force me to file DMCA's all day and all night. LLMs and other forms of generative AIs are an environmental hazard, they're stealing and money laundering art and writing from my fellow creatives who NEED to make money off their work, they're wasteful, cheap, ugly, and add no value to the community. There are practical uses of AI. The AI models that are designed to analyze cancer cells and Nazca lines in middle/south America are OUTSTANDING uses of AI. Chat GPT and other LLMs, however, waste environmental resources by the bucketful just to write an email. Kids have been using it in school to avoid learning. Adults have been using it to avoid doing their jobs. The result is that people are relying on an unreliable tool and accidents have been occurring left and right because people cannot understand that it is a machine and not an incredibly intelligent person.

LLMs are fundamentally a problem in the creative community, and if you want there to be art and writing in the future, it needs to be far more restricted than it already is, because no one is capable of contributing to the world without fear of having their work stolen in perpetuity.
