

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-2iv2-vbk5
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-8351

Comment on FR Doc # 2025-02305

Submitter Information

Name: Nicholas Doyle

Email: [REDACTED]

General Comment

People's creations are of their own, and should not be put into a machine and be regurgitated to slop

Also, AI can be a reckless tool, making people do or say things they have not. This is dangerous on multiple levels.

Let's not forget the environmental impacts AI has. "The proliferating data centres that house AI servers produce electronic waste. They are large consumers of water, which is becoming scarce in many places. They rely on critical minerals and rare elements, which are often mined unsustainably. And they use massive amounts of electricity, spurring the emission of planet-warming greenhouse gases." - UNEP.org

AI should not be used for generative purposes, but rather practical purposes, like the AI developed to detect breast cancer extremely early. That's what we should be implementing AI tech for
