General Comment

AI can be advanced in a manner that isn't infringing on copyright and privacy law. The general public should not be forcibly opted in to using AI in search engines or content creation. AI programs should be restricted to voluntarily submitted content and adhere to copyright law in its training algorithms. Most artists and content creators do not want their work put into training something that many tout as the thing that will put all artists out of a job. AI content is not art, and is still in such an experimental phase that it should not be an authority on major search engines like Google, Bing, and Brave. AI searches should be eliminated from the general internet and generative AI features should remain opt-in only.
