General Comment

This is a horrible idea that will have far reaching negative consequences for cyber security protocols and procedures in public and private institutions, by essentially jeopardizing the privacy and safety of sensitive and top secret information.

Additionally, this will place the privacy, safety, and civil liberties/rights of many individuals living in the United States at risk, and will only ensure the United States, as a nation, collapses further whether that be through an enemy nation using AI for espionage and/or AI gaining sentience and taking over the federal and state governments' computer and network systems.
