General Comment

As an individual who is supportive and adjacent to the tech industry, constant innovation is necessary. Advancements should not come from sacrificing privacy and personal boundaries of individual Americans. The United States needs to be protecting its citizens, it's foundation, and it's future from threats, both foreign and domestic. Allowing AI to use any and all information with restrictions or guardrails is opening up our country to expose state secrets and setting up to become vulnerable sitting ducks to be pillaged and plundered by other nations who wish to do us harm. Keep our country and our citizens protected by allowing us to maintain a level of privacy and authority over our own data.
