Dane Lorig Re_ AI Action Plan

From:
Dane Lorig

Re: National Science Foundation's Request for Information on the Development of an Artificial Intelligence (AI) Action Plan

I am an everyday American who creates art as a hobby. I have **worked hard for years to develop the skills and knowledge to expand on this hobby**, and have been lucky enough to garner a small online following from it, though I have had concerns about its viability as of recently.

The AI systems made by Big Tech companies like OpenAI (Microsoft) and Google threaten to destroy the businesses and livelihoods of thousands of American creators like me with their recent demand to create special carve-outs in copyright law.

AI systems can only be produced by first **training on work made by people**. The work of **hundreds of thousands of other everyday American creators**, and potentially even my own, has been **taken and fed into these AI systems without our consent or any compensation**. They **ingest** our work, **reassemble** it, and then **sell** it back to clients – directly competing with us and **cutting us out of the marketplace**.

Now these Big Tech companies are asking this administration to **create exceptions and loopholes to make this practice of stealing American creators' copyrighted work legal precedent**. They are suggesting that if a machine ingests and reproduces copyrighted work, it is somehow suddenly "fair use".

They seem to believe that anything and everything on the internet – regardless of who owns it – should be theirs for the taking. They claim that if this administration does not allow them to rewrite the law in this way, it will stifle American innovation.

Instead, it will have the opposite effect. The purpose of American copyright law is to protect the incentive to create and innovate.

If we the American people do not own our creations, and everything we put online will be stolen by Big Tech giants, **what will be the incentive to create?** If everyday Americans create a new innovative piece of computer code, a new visual design, or a new piece of music only to have it

immediately stolen by Google and Microsoft, **why bother creating it in the first place? How will we possibly make a living doing these things?**

Want to protect American innovation? Protect American creators. **Do not create new copyright exemptions that allow Big Tech companies to exploit and steal from creators and everyday Americans without permission, compensation, or transparency.**

This administration's AI Action Plan should focus not on giving away creator content to Big Tech companies, but rather on ensuring a fair marketplace with competition:

- First, the government should ensure that creators and everyday Americans give effective **consent**, so that we can decide **when and where our work is used by AI systems**.
- Second, the AI Action Plan should encourage a robust **licensing** marketplace, so that the incentive to create for small businesses is preserved. Our work has **immense economic value**, so the value generated by that work should **accrue to the original creators**, not just Big Tech.
- Finally, the AI Action Plan should require **transparency** from Big Tech companies, requiring them to **disclose what material is in their training datasets**, and **label what content is AI-generated**.

I am by no means anti-technology, but we should not sacrifice the hard work of hundreds of thousands of Americans and give it away to Big Tech by **rewriting the very fundamentals of copyright law**.

I deeply thank you for the opportunity to comment on these important issues.
