General Comment

I believe Ai should be heavily regulated, it is a new technology and there are few laws in place to regulate it. The privacy of every American is at risk with the proposed legislation, and should not be called to a vote.
Any congress person who votes shall vote against deregulation of new technologies, American children will be at great risk with how few laws are in place against rampant and unregulated ai models.
As a concerned citizen, I heavily encourage congress to think of the American children. Not doing so is an abdication of their official duties to this country.
