General Comment

Generative AI is almost utterly useless, takes millions in jobs it steals and used up resources faster than human beings could doing the same job. Wealthy and rich patrons ALSO owns copyrighted material. This isn't about making pictures. What would Apple say to a prompt to make more Beatles music, but ANYONE can do it? AI uses stolen copyrighted material, meaning it IN TURN cannot be copyrighted. That is what you are looking at. It sounds like a boon on paper but much like worthless cryptocurrency, it's a bubble so easily popped and exploited is ways unimagined.
