General Comment

This is the last thing our government should be focusing on. If the government wants to do anything related to AI, it should be to regulate it to prevent the myriad of privacy, safety, and environmental problems it is already/has the potential to cause. We're already seeing harm; I know someone who had 10% of their company laid off (a few thousand people) and the next day the CEO was in meetings talking about how they were introducing AI tools to help the remaining workers. This technology is honestly a scourge, and I have essentially no faith in the companies developing it or our government to ensure it doesn't cause harm. But like I said, our government has countless other problems they could be trying to solve, like inflation, the unemployment rate, the stock market in free fall, ICE kidnapping legal residents and torturing them, very much alive senior citizens having their hard earned money stolen from their bank accounts because Social Security decided they're dead...
