General Comment

I do not believe AI holds a place in the future of the US. As an American artist and writer, AI steals from my livelihood as an American and profits off of theft. AI is over hyped and is fleecing the eyes of the American public. To give openAI special treatment in the context of copyright is not only a hypocritical and unethical thing for the government to condone, it calls into question the very notion of copyright law. Why should one company be allowed to break the law and steal other's work while the rest of us and other companies must stand by and let their work be stolen, all the while forced to follow the law that others don't follow. Please, do not allow openai nor anyother ai company to freely break copyright law. There are other ways to use and train ai data without resorting to theft.
