General Comment

I am against this proposed rule. If "AI" needs to have unfettered access to stolen intellectual property in order to remain "competitive," then its business model is broken and should be completely dismantled. Algorithms don't "create" anything, but use fancy math to build probabilities of words and images. This is not how humans create. And real artists and writers are being pushed to the economic fringes without these false technologies invading their space with the promises of billionaires and false AI messiahs. Artists and writers need to be protected from companies stealing their work. Not the other way around.
