Re: National Science Foundation's Request for Information on the Development of an Artificial Intelligence (AI) Action Plan

I am a web developer with a passion for both technology and art.

Generative AI is a scam that has infringed on the copyright of everyone from small artists to large media corporations. They should not be granted any copyright exemptions. This technology has already been used to create illegal, obscene imagery such as child sexual abuse. It will only undermine artists' ability to be able to make a living while draining money and resources at taxpayers' expense.

Thank you for the opportunity to comment on these important issues.
