## General Comment

AI is ultimately an energy ineffective method that is being abused to produce cheap, meaningless content by countless bad actors, damaging the trust many have on artists across the internet and beyond out of fear that what they see isn't truly art but a cheap imitation rendered by a machine.

No matter how pure the intentions, there should be brakes and limitations to the content these companies and their projects can intake, and it should respect the boundaries of other nations and individuals.

This won't make the situation any easier, merely exarcebate the issue.
