General Comment

I have returned to working as a performing artist, and my work and portfolio is building across screen, stage, and behind a microphone for voice acting.

To have my work used to train models without my consent is a direct and unacceptable harm upon my livelihood and the livelihoods of my peers. Especially as a returning worker to the field of simple and modest living, where the vast majority of working performers maintain their lives.

The uses of AI are not without merit, and it is making incredible leaps in science that can help humanity in astonishing ways, but it's usage of our creative selves to generate half-baked approximations of our creativity simply saps the soul of what it is to be human. Why must we outsource our joy and spirit to a soulless machine?

We implore you to not allow this to be the future of creativity and art.
