General Comment

Giving AI especially one company unlimited access to copyritten material would stifle American innovation and creativity as well as put a damper on free speech. America is great because of competition and the idea that anyone can write the next great American novel, be the next Spielberg, the next Springsteen, and that their hard work and efforts deserve to make them money and for everyone to control what has access to their speech. The government shouldn't be picking winners and losers in this space as it's still new. Thank you for your time.
