General Comment

Do not let OpenAI use copyrighted material to train their AI, it is theft! AI should not be permitted to have a place in what's being called "national security", in fact - entertaining such a thought demonstrates a lack of interest or care in the rights of the average American. It steals jobs, it steals material, and it consumes too much energy to be sustainable long-term. The government allowing AI to control very sensitive sectors would be an invitation to untold disaster, so if anything, AI should be outlawed and OpenAI should be shut down or banned from Government affairs. Again, it steals from the livelihood of Americans and profits off theft. Supporting this would be an attack on the constitutional rights of all Americans.

Leaving human lives & livelihoods in the hands of AI WILL make things worse, and WILL harm chances of re-election, as well as endanger the livelihood of countless US citizens. People over Profit.
