

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-2p28-op4q
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-8502
Comment on FR Doc # 2025-02305

Submitter Information

Name: Sam Rafkin
Address: United States,
Email: [REDACTED]

General Comment

AI is not the revolutionary technology that the companies backing it would have you believe. Rather than generate new information at the push of a button, it instead steals this information from thousands of unwilling participants.

Ofentimes corporations will harshly police the internet for anything that might be a violation of copyright, regardless of concepts like fair use. Yet these same companies use AI as an excuse to ignore the rules, steal the work of struggling artists around the world, and see no issue promoting it as the future.

The arts are always the first thing to be attacked in times of stress. And while AI may not affect more traditional industries for the moment, I ask you to consider what happens when this moment elapses. Because this is not about a small cabal of Hollywood elites trying to hoard money, as AI advocates will try to convince you.

It is about the people who live on meager paychecks trying to have their artistic voices heard. It is about the people working multiple gigs just so they can attempt to make art. Their lives are tough enough. They deserve to at least know their work will remain theirs, and not be force-fed into a machine with no morals, no ethical line in the sand, and no intervention from humankind.

None of us have the power to enact change on such a large scale. But you do. I hope you will make the choice to better our world by encouraging the human artists we already have, not replacing them with soulless corporate algorithms.

Thank you for your time, and I hope you will see this issue the way so many of us do.
