General Comment

The use of generative AI, especially unregulated, is the greatest known threat to our freedom of individual and collective expression and individual right to own that which we produce ourselves. Time and time again as this fledgling industry grows, it is found that AI technology is used to illegally steal and copy art, impersonate our voices, and even produce fraudulent video content. If our government truly valued the merits of it's great citizenry and their labors, it would seek to regulate generative AI technology so that it could possibly improve specific aspects of our business endeavors, and not steal away the livelihoods of our great creatives.
