General Comment

Generative AI is plagiarism tech. It's anti-human, and exactly the wrong type of thing we should be automating through programs. AI should do dishes and spot cancer cells, and people should make art and stories. Not only is generative AI plagiarism, it is also inefficient and horrible for the environment. Furthermore, people who create art and writing and stories have intellectual property rights which should not be violated by skimming and AI training. STOP MAKING EVERYTHING AI; A LOT OF US HATE IT.
